TO WHOM IT MAY CONCERN:

It has been my privilege over the past year to observe and work with Huckabee & Associates on our feasibility study. Huckabee started by listening to our wants and needs for our school facilities and worked within a budget for practical solutions. Throughout the process, I was impressed by their eagerness to work in true partnership with management and staff to meet the functional requirements of all of our buildings and to help us to increase our capacities to make a significant difference in serving our students. With their expertise we have developed a solid foundation for the next steps of this important work in progress.

The Huckabee firm also recently worked with our administration in the design of Elementary No. 15. During the design process of this new campus they consistently endeavored to keep in mind the objectives of the school district and interests of our Board of Trustees and community. As master planning is a critical part of the visioning process, their feasibility study also includes a timeline for opening this new campus.

The successful results we achieved in these very complex projects demonstrated Huckabee's high level of competence and skill. Our schools and campuses will benefit for years to come from this collaborative relationship.

Sincerely,

Jim F. Chadwell, Ed.D.
Superintendent
