

FROM: Jayne Beale^{JB} Graham ISD Technology Director

SUBJECT: Huckabee Recommendation

Our school district recently passed a bond that enabled a massive renovation and construction project at our high school and Huckabee has been a huge component of this process. As the Technology Director for Graham Independent School District, I have had the opportunity to work closely with Huckabee employees through this on-going process. It is my great pleasure to recommend "Team" Huckabee for your school district.

From the beginning, my technology department has been included in all technology aspects of the entire project. Al Lawrence, our Huckabee Technology Consultant, has been a constant source of knowledge, skills and resources. His professional concern for the successful implementation of technology in the planning, and future implementation of the process, has been a constant source of comfort as we work through this project. He is always a phone call or e-mail away and has made numerous trips out to our district to meet with us.

Through the coordination of all Huckabee associates, I have been overwhelmed with the eagerness of the employees to help us. They are always willing to go the extra distance to make certain that each detail is covered and every question answered. Team Huckabee are definitely advocates for the success of our building project. I am proud of their contributions to our community and even prouder of their commitment to our students—who are, of course, our future.
